PRICE TWO CENTS

Union Ballroom Scene Of Alma Mater Tonight

Syncopation To Be Furnished
By Acadians

SCENIC EFFECTS

Sale Of Tickets Large And
Good Attendance
Expected

A colorful scene will meet the eyes of those who are attending the Alma Mater Dance tonight which is to take place in the Union Ballroom. As far as the decorative effects are concerned, at least, the affair promises to be an unqualified success. Due to the efforts of the members of the department of Architecture, the Ballroom has been completely transformed. Panels have been placed in the windows, each one of which depicts one of the faculties of the University. Red, black and white streamers cover the walls, while a large moon is to be placed in one corner of the room.

Work continued till a late hour last night finishing the decorations. The Ballroom is beautifully planned and is well worth a visit by any student. Everyone should take the opportunity to go up to the Ballroom and look it over. There is a new feature this year; that is a canopy over the orchestra stand which adds considerably to the beauty of the room. The balcony on the south side has been fitted up in more elaborate fashion than previously and should prove a popular place to sit during the intermissions.

A bell has been installed in the reading room on the second floor in order to insure that everyone may know that another dance has commenced.

The program design is thoroughly in harmony with the general effect and will prove a pleasing souvenir of the dance. It is a better piece of work than has appeared on a college dance program for some time.

It is to follow the schedule, which was published in the Daily on Wednesday, with the exception of one change. The seventh dance will take place between the first and second supper sittings, instead of after the second supper.

The patrons and patronesses are Dr. and Mrs. Martin, Dean and Mrs. Ira Mackay, Dean and Mrs. P. E. Corbett, Dean and Mrs. H. C. Perrin, Col. (Continued on page three)

Funds Required By School Board

Cannot Carry On With Present Allowance, Claim

The Montreal Protestant Central School Board made it clear to Premier Taschereau that they did not think that they could go on after the end of the present school year educating non-Catholics and non-Protestants on the basis of \$60 a year, according to H. E. Kelley, Professor of Physics at McGill. It has been found that the amount required for each child is 75 dollars, which would mean that the Neutral Panel would have to grant an extra \$150,000. The Neutral Panel supplies the difference between what is paid by non-Catholics and non-Protestants and the cost of education, which was fixed at \$60. If the \$150,000 was paid it would mean that there would be that much less to be divided between the Protestant and Catholic Commissions, a loss which the Protestant community should not be asked to pay.

The finances of the Montreal Catholic School Commission have improved and this was one of the arguments which induced the committee to approve the two million dollar plan for the commission without opposition. The payment of an additional \$150,000 dollars a year from the Neutral Panel on account of non-Catholic and non-Protestant education would necessarily complicate the Catholic position.

The delegation consisted of Major LeRoy Shaw, chairman, the Rev. Principal James Smyth, Rev. Canon J. E. Fee, Professor H. E. Kelley, A. P. Byers, W. E. Dunlop, Secretary Controller and Col. J. J. Creelman, K. C., counsel. This delegation was in Quebec several weeks ago on the same subject and at the time of departure was under the impression that the Government would bring in a bill to provide that the Protestant board would receive the full cost of education, whatever the cost might be to each of the Pro-

Nominations For S.C.A. Board Are Called At Once

In view of the fact that the Annual General Meeting of the McGill S.C.A. will be held on Thursday, March 7th, at five o'clock in Strathcona Hall the executive calls for nominations for the position of presidency and for members of the board.

It is in the hands of the students of McGill to nominate whomever they wish for these offices. There are ten members of the board and from these are elected the vice-presidents, secretary and treasurer. Nominations are to be signed by ten undergraduates of the University, irrespective of year or faculty.

The McGill S.C.A. itself has a nominating board and itself will propose a certain number of men for the board for the coming year together with a candidate for the presidency, but this does not in any way preclude the chances of those who are nominated external of the Association. The vote will be taken by ballot at the annual general meeting. Nominations are to be handed in to Chuck Stewart, Secretary, at Strathcona Hall previous to the day of the meeting.

Revue Promises Real Good Show

Novel Chorus Steps Guided
by Allan Murray

MUSIC OUTSTANDING

Liberal Sprinkling Of
Skits Throughout
Production

When the curtain rises on the Revue White Revue of 1929 in less than three weeks, a highly critical audience will be on hand to view the ushering in of the first revue to play in a local theatre this season. Word has gone round that the McGill show will this year make a distinct advance in the matter of local production with the music and some of the dances said to be particularly distinguished, and ticket office inquiries go to show that a crowded house will anxiously and critically await the premiere.

Rehearsal of every presentation in the show has been going on apace during the past two weeks, and the first general rehearsal will be held tomorrow. Under the guidance of Allan Murray, a large chorus has been diligently practicing some novel steps, and from advance reports, the show will open with the chorus doing a dance that should send the Revue off to a flying start. Ultra-modernistic in its conception, the opening chorus number will provide, it is said, some of the best moments in the entire programme.

A glance through the program now in preparation indicates that skits will be liberally sprinkled through out the performance. Ranging in subject matter from the battlefields of France to the marital troubles of a modern couple, the playlets give McGill's comedians opportunity enough to send their audience into roars. One of the skits features an air fight over the battlefields of France, bringing in some spectacular scenic effects. A moment later the audience will be the witness of a pathetic scene in a fraternity house. The playlet brings to light the trials and tribulations of one of the Junior promenaders. And so a humorous spotlight will turn from one situation to light up another cross-section of everyday life.

Of the music, it is announced, little need be said. Those who have heard excerpts from the revue songs have been loud in their praise, and it will surprise no one to see the songs spring into instant popularity.

Managers and Executives

Notice is hereby given that Tuesday March 5th, is the final date of copy for the McGill Annual. Any reports or pictures of teams, clubs or societies that are not in the hands of the Annual Board by that time will not appear in the Annual.

testament commissions. Such a decision of the situation is today. Premier Taschereau has promised to talk the matter over with his colleagues with a view to deciding what could be done. It is understood that the delegation was strongly opposed to allowing the situation as it remains financially today, to continue until June of 1930, which was the Government suggestion.

Employment For Seniors In Arts And Commerce

Fourth Year Men Should See
Col. Bovey This Week

LOCAL CONCERNS

Prospective Positions Are
Mostly Office Work; Prac-
tice Employed In States

At least two important corporations of the city are considering the employment of a number of this year's graduating class in Arts and Commerce, according to Colonel Bovey who has been in communication with the companies. The prospective jobs would take the form of office work.

Fourth year men in these two faculties who are interested in the proposal should see Colonel Bovey for further particulars during the course of the next week. They should bring with them a statement, typed out, of their name, address, denomination, age and course.

For business corporations to approach the university in Montreal with a view to engaging Arts students is a new departure, though in recent years it has been the established procedure for engineering students to obtain situations on graduation by choosing from among a number of opportunities offered to the final year by industrial concerns.

In the United States, however, the practice of canvassing the graduates years in the important colleges in order to engage some of the class is well established. The American Telephone and Telegraph Company, largest of the American corporations, has definitely embarked on the course of employing college graduates immediately upon graduation.

According to one of their officials, "employment of college graduates comes through delegation visits to the colleges under the co-ordinated recruiting campaign, and on personal application to our own offices. The basis of selection is a broad one including character, personality, and achievement of all sorts at college, with emphasis upon a creditable scholastic record."

Of the 7500 college graduates in the employ of this company at the close of 1928, 4300 had had engineering training, 2800 were graduates of colleges of arts and sciences or of business, while the remainder had other training and could not be classified. The men of arts and science and business training in general were not under a handicap as compared with engineers in the work which they usually entered.

Therefore it would seem that a similar tendency of the part of Canadian companies to seek directly to employ college graduates is a sign of a growing opinion that it is profitable for them to take college men, even if they have to pay them more.

Dr. Raymond Tanghe to Address Meeting

Professor Of Social Sciences At
Sociological Society

Dr. A. V. Douglas gave an address "Review of Recent Advances in Astrophysics," at the physics colloquium last night in the physics building. Among the points that were discussed was the discovery of another companion star to Sirius, at an observatory in South Africa. It is possibly denser even than Sirius. There were further elements identified in the sun from its spectrum—Boron and Argon.

There was also a discussion of methods of determining the magnitude of stars. The effects observed are reduced to the effects that would be observed at a standard distance, the mean distance of the earth from the sun would subtend an angle of 19'.

The absolute magnitudes are determined in three different ways.
(1) To give the visual magnitude
(2) Radiometric Magnitude i.e. Magnitude of radiated energy.
(3) To give the photometric magnitude.

Curious were shown indicating these relations.

Relics To Be Shown In France

Historic relics of early French Canada from the David Ross McGold Museum at McGill University, will be

Cercle Francais To Present Play At Next Meeting

The next meeting of the Cercle Francais, to be held in the Union on Thursday, March 7th, will be of a special nature, as a one-act play will be presented in addition to the usual debate. This skit, entitled "A Slight Misunderstanding", has been translated specially from the English for the occasion, and the executive of the Cercle feel that it will get a rousing reception.

Those taking part in the skit are Eugene Joliat, Gilbert King, and Hubert Desbarats. The latter will interpret a difficult feminine role, at which art he has already shown himself adept.

The debate will follow the lines of that held at the last meeting. A subject, to be announced later, will be introduced by two speakers, one supporting each side, and then the meeting will be thrown open for debate by all present before the vote is taken.

Germ Infection Bost Discovery

Electrons, Protons, Photons,
Compose Matter

USES OF WAVES

Dr. C. Fisk Spoke At Mechan-
ics Institute Last
Night

"All matter is active, and it is made up of electrons, protons and photons," stated Dr. George Fisk in the course of an address on "Physio-Therapeutics" last night at the Mechanics Institute.

The speaker stated that there have been many accomplishments during the past 50 years, but the greatest of these is the discovery of germ infection. Before this period there were many plagues, as well as epidemics which were directly due to germ infection but with the advance of Pasteur's discovery, the medical world was revolutionized. Many of the diseases, which previously were considered incurable are now cured with ease.

"The study of Physio-Therapy deals with the light, heat, cold, and sun rays effect upon the human body." The body is made up of infinitely small cells. Each of these is composed of a definite number of electrons and protons. Different kinds of matter are made up of different numbers of these protons and electrons. These protons and electrons are electrically charged, so that each cell is a little electric body. These cells are made up of acids and alkalis. When there is a balance between the acid and alkali, the cell is in health, but when the equilibrium is disturbed, the health of the cell suffers.

When the health of a cell breaks down certain waves are used to build it up again. There are different sorts of waves such as sun's rays, heat waves, and light waves. If an electric wave is applied to the body so that a definite number of electrons move too fast, and certain waves are used to slow up their speed. If, however, the body gets too cold, certain waves are then used to introduce electrons or to raise the speed of those present.

The speaker then demonstrated several instruments used in therapeutics. Some of these are used to put against glands to stimulate them. They are made by inducing a magnetic field in the electrodes and then applying the later to the particular gland. Certain instruments were shown which are used to exercise muscles without fatigue. This is done by putting a current through the machine and through the muscle, and then cutting on and off. The muscles contract and expand so that they are exercised rhythmically. This muscular massage puts back the electrons where they belong, tuning up the particular cells.

Dr. Fisk demonstrated instruments which charge the body electrically. (Continued on page four.)

shown at the historical exhibition to be held in France in April. Major Lanctot, of the Archives Department at Ottawa, selected a few specimens during a recent visit to the local museum.

A snuff box belonging to Montcalm and a silver cup from his military equipment, also an autographed letter by Francois Hertel, were among the articles chosen for exhibit in France.

Miss Gaultier Reveals Wealth Of Our Balladry

Eskimo, Indian And Canadian
Folk Songs

MOYSE HALL FILLED

Motion Pictures, And Cos-
tumes Lent Color To
Her Recital

Miss Juliette Gaultier's recital of Eskimo, Indian and Canadian Folk Songs, revealed the wealth and beauty of our native ballads. One of her songs gathered from the Copper Eskimos dates back to the stone age, when, as it is imagined, man was void of finer sentiment. Strange to say it is a thing of beauty, with a richness of melody, found only in nature.

The entertainment opened with a motion picture of the Eskimos, "Back to Haffin Land." It was an interesting portrayal of Eskimo life, with its picturesque background of the Arctic summer. There were some remarkable views of ice floes, and ice bergs, among which polar bears could be seen slowly wandering about.

Miss Gaultier next appeared clad in an Eskimo costume of a medicine woman. The costume was obtained from the Stefansson Expedition and was a strange blend of brown and black, with weird designs in keeping with the religious ideas of that far people. Her first song was a lullaby, a sleeping song. This was followed by the "Seal-Poke," which is sung by the children all along the Arctic coast of Alaska.

The next was a children's game song "The Sparrow Song," used by them when setting snares for catching sparrows in their nests. The last of this group was by a Point Eskimo. Asetsak. It is called the "Homesick Song" describing his loneliness and his longing for his home.

The second group consisted of Copper Eskimo songs, some dating back to the stone age. All these songs were accompanied by a primitive drum consisting of a hoop over which was stretched a piece of deer-skin, an instrument used long before man elsewhere knew the art of music.

The second film to be shown gave views of the Indian life in British Columbia. Totem Land. This was followed by another group of songs, gathered from the Nootka tribes on the West Coast. The costume Miss Gaultier wore for this group was that of a dancer, probably belonging to some Indian maiden now long since forgotten. It was a strange and picturesque costume. The skirt was of brightest red and was encircled with hundreds of tiny thin, which jingled in time with the dancer. The leggings too were trimmed with golden bells. The blanket and hat had a religious significance. On them were woven figures of frog deities, and shark gods. The leggings were ornamented with the thunder bird, the designs of their most revered god.

Her first number was the song sung at the coming of age of the (Continued on page two)

Guests At Tea

Fifty Graduates Present At
Function

Members of the McGill University Library Alumni Association held a tea yesterday afternoon at the Redpath library for the students who are at present enrolled in the library course of the university. Guests were received by Miss Alice Hayes, the president assisted by Miss Jean Cumming and Miss Beatrice Simon. Tea was poured by Miss Cumming and Miss Fannie Horne.

About fifty guests were present representing the graduates of the full library course at McGill, which has only been established of recent years, and the graduates of the short summer courses at the university which have been in existence for a number of years.

In addition to members of the association the following were among the guests: Miss Gwen McEwen of the Canadian Bookman; Dr. de Resil-Rose, curator of the Gesti Nancy research library and Miss Nancy Lee Swann, Miss L. E. Boutillier and C. B. Kwei of the staff of the Chinese library; Mrs. Mary Duncan Carter, assistant director of the library school; Miss Herdman and Miss Higgins, of the staff of the library school; G. M. Furman, Miss Hadow and Miss Laura Young.

U.S. Cabinet To Contain Head Of Big University

Washington, Feb. 28.—When Herbert Hoover, President-elect of the United States names his cabinet, there will be included in the list of names of those who are to administer the destinies of this country for four years, that of Dr. Ray Lyman Wilbur, president of Stanford University, California. It is announced that he will be Secretary of the Interior and that he has received a five-year leave of absence for the purpose of serving his country in this ministerial capacity.

Dr. Wilbur, who is an LL. D. of three universities President of Stanford University, and a former dean of the Medical School, there has had a very distinguished career in both of these offices. Among many such executive positions filled by him, he has been Trustee of the Rockefeller Institute; chief of the conservative Division, U. S. Food Administration. He has also been President of the California State Council of Defense, 1917.

Dr. Wilbur spoke at McGill a few years ago under the auspices of the Canadian Club, on the subject of "Racial Contacts and World Problems in the Pacific."

Companionate Marriage Upheld

Goodman And Lewis Defend
Ben Lindsay's Theory

CLOSE DECISION

Present Institution Of Mar-
riage Supported By Bates
And Cooper

"Companionate marriage has for its basis the belief that scientific investigation tends to bring about better happiness among men and women," stated David Lewis at the Arts Sophomore debate held yesterday afternoon. Sam Goodman and David Lewis successfully defended the issue that Companionate Marriage is more beneficial to humanity than the present institution of marriage. Their opponents were Clarence Bates and "Alf" Cooper.

Goodman of the affirmative opened the debate with the assertion that companionate marriage is legal marriage with legalized birth control. The benefits of companionate marriage are fourfold. Firstly it does away with illegitimate children. Secondly, it prevents those physically defective from breeding defective children. Thirdly it provides a period of trial, which enables the couple to determine whether they are really suited for one another. Fourthly it insures that children will be born in families that are only ready to receive them. This includes the financial aspect for matrimony is mostly money.

The first speaker on the negative side was Clarence Bates, and he stated that a disintegration of the home life as advocated by companionate marriage would affect the nation like the crumbling of the foundation of a building. To us now we see the home as a life long companionship of man and woman for love.

The most important thing in life is the reproduction of mankind. Companionate marriage will reduce the population by 33-1-3 percent. Companionate marriage gives a wrong start to the young couple. It does not hold up the vision of lifelong love, but holds up to them self-love and self-indulgence and therein lies its failure. The first year of marriage is the hardest, but once the first year has passed and children have arrived, the home ties are tightened and the (Continued on page four.)

Seven Debates On Subject Of Modern Paper

Jeffris And Lande Against
McMaster Here Tonight

STRATHCONA HALL

B. K. Sandwell, Adjutor Sav-
ard And Roy Campbell
To Be Judges

Tonight in Strathcona Hall, students will have an opportunity of hearing one of the first debates of the annual contest of the Inter-University Debating League, on the subject "Resolved that the Influence of the Modern Newspaper is in the best interests of the Public."

The McGill team, composed of J. D. Jeffris and Harold B. Lande, will uphold the affirmative of this resolution against a team from McMaster University. The debate will start at eight-fifteen. Philip Foran, Vice-President of the McGill Debating Union Society and President of the I.U.D.L. will preside. The judges will be B. K. Sandwell, well-known economist of Montreal; Adjutor Savard, Editor of La Patrie and leading Canadian journalist, prominent in encouraging better relations between the two races in Canada; and Roy Campbell, Secretary of the local branch of the National Council of Education and Chairman of the Montreal Branch of the Chartered Institute of Secretaries. At the close of the debate anyone who wishes to express his views on the subject may do so while the judges are out making their decision.

There will be six other debates on the same subject tonight. Each of the universities in the League will have two teams debating, one at home and one at another university. McGill at Queen's; Queen's at McMaster; Osgoode Hall at Loyola; Loyola at Ottawa; Bishop at Osgoode Hall; Ottawa at Bishop's. The teams are divided into two groups, the first composed of McGill, McMaster and Queen's and the second of Loyola, Bishop's, Osgoode Hall and Ottawa University. The winning teams from both groups will later debate for the silver cup, now held by Osgoode Hall, which is given to the winners of the series. The final debates are to take place on March 14.

The men who will represent McGill in this series are very well known around the university. Stone and Jeffris have been prominent at the meetings of the Debating Union Society here. Bernard Alexander, who with Fred Stone, will meet Queen's team at Kingston tonight, has just recently returned from a very successful debating tour of England and Scotland to take up his studies in Law again. Lande, an honor student in economics has proved himself worthy of his reputation as an excellent speaker.

Companion Star To Sirius Found

Dr. A. V. Douglas Reads
Papers

Dr. Raymond Tanghe, Professor of Social Sciences at the University of Montreal, has been announced as the speaker at the next meeting of the Sociological Society of McGill University, which will be held on Tuesday evening, March 5, in Room 39 of the Arts Building.

Dr. Tanghe has recently come into prominence as the author of "Geographie Humaine de Montreal," in which is embodied the results of a careful research into the economic and sociological pattern of Canada's most interesting city. The human geography, the distribution of people in relation to each other, is a study calling for a wide knowledge in many fields. It is in such research projects that all students of sociology get some of their most valuable training, hence Dr. Tanghe's address promises to be of unusual interest to many McGill students at the present time.

Dr. Tanghe has studied in France under such eminent Sociologists as Bruhnes and Villaux. The "Geographie Humaine de Montreal," which is his doctor's thesis, was written after two or three years' special study and research in connection with the department of Social Science at the University of Montreal.

There will be a meeting of the Associate Board of Editors of the Daily next Monday at 4 o'clock. All members are requested to be present as important business will be discussed.

MONTREAL, FRIDAY, MARCH 1, 1929.

A BUSY TIME

This is one of McGill's busy days. The debating Union is both at home and abroad in the first of the preliminaries of the intercollegiate debates, the home team will defend the affirmative of the resolution concerning the excellence of the effect of the modern newspaper on its readers, while abroad we are opposing the motion. At the same time the Convocation Hall of the R.V.C. will be the scene of the preliminary tussle of the four womens basketball teams over the question as to which of the Universities has the best basketball team. And in the Union Ballroom the big social event of the college year takes place, when the Students' Council is at home to all and sundry who wish to practice the terpsichorean art.

They are all important events, and it is only regrettable that they all arrive on the same day. To the women the basketball event is an important one, as it is only once in four years that the visitors will find a warm welcome by their friendly enemies here. Warm in more senses than one.

To the men of debating interests the debate against the McMaster team will be of peculiar interests. The subject is a pertinent one, and the quality of the debating heard here this year has been a standard that promises high for the chances of the McGill representatives. We can unreservedly recommend the debate as well worthy of attendance.

To the visitors we extend our greeting, and to our home teams we hope for success.

ARGENTINA

In our news columns we carried yesterday a report of a lecture on Argentina and its relation to Canada. This may have served to draw attention to the very great similarities which exist between our own country and the great republic of South America.

Argentina is not, as many Canadians fondly believe, a small unimportant and storm-tossed state. It is a modern nation in every sense of the word. Its population is greater by a million than Canada's. Its great area produces all kinds of natural products, from the sugar-cane of the tropical north to the wheat of temperate pampas and the sheep of Antarctic Patagonia.

Owing to various causes which were dealt with in the lecture Argentina has not progressed so rapidly as our country. It needs roads; it needs colonists; it needs a co-operative grain growing system; it needs elevators.

Supremely significant to us is the fact that enlightened Argentine opinion looks to this country for guidance in effecting these reforms. Argentine professional men every year visit our Dominion and return full of praise for our efficient economic system. Returning to their own land they write and lecture on what they have seen here. When reforms come they are modeled on Canadian experience. The colonization plan adopted by the Argentine railways is a replica of that in operation here; the projects put forward for handling Argentine grain in bulk are copied from Canadian practice.

But though Argentina may know Canada intimately, Canada would appear to know little of Argentina. And that is our loss. There can be no doubt as to the brilliant future ahead of the great republic under the Southern Cross. Already Buenos Aires is the largest city in the southern hemisphere; already Argentina has taken second place among the world's wheat exporters; already she is fourth in the list of cattle raising nations. Her importance in the world's trade may be judged from the fact that she is Great Britain's third best customer for manufactured goods. Qualified observers estimate that 86% of the country's agricultural resources are as yet untouched, and that it is capable of supporting a population of 100,000,000.

The roseate future ahead of Argentina affects Canada vitally in two different and opposite ways. Our manufacturers are exporting increasing number of goods to the southern republic, and may be expected to share in her future expansion. But an increased efficiency in grain growing on the pampas would mean a lower price for wheat. How this will affect Canada need hardly be pointed out.

The rising generation of Canadians will have to pay far more attention to South America in general, and to Argentina in particular.

Proposed Constitution of Students Society

(Proposed by Reversion Committee)

Ed. Note:—This constitution has been prepared by the revision committee and will be presented at the meeting of the Students' Society on March 20th for approval.

The main changes involved are these:

- 1—Article III relating to members of the graduate school.
- 2—Article V, regarding the number of students who must sign nomination sheets for President of the Society.
- 3—Article VI, regarding the position of the Editor of the McGill Daily and the President of the Union on the Council.

Students are urged to keep their copy of the Constitution for reference.

ARTICLE I

Name

The Students' Society of McGill University.

ARTICLE II

Object

An association of undergraduates formed to exercise general control of all undergraduate activities and the relation of the undergraduates with the University subject to the University Statutes and the jurisdiction of the Corporation and the several faculties.

ARTICLE III

Membership

- (1) All men undergraduate members of the University and all men students of the affiliated theological colleges, who pay the universal fee and students of the faculty of Graduate Studies who are undergraduates in any faculty or who are men students in affiliated theological colleges and who pay the universal fee.

ARTICLE IV

Fees

- (1) Each member of the Students' Society shall be required to pay an annual fee of \$17.00. This sum to be collected by the Bursar with the regular tuition fees, and divided as follows:

Athletic Board	\$10.00
Council	1.50
McGill Union	3.00
McGill Daily	1.50
Undergraduate Society	1.00

ARTICLE V

Officers

The Officers shall be a President, a Vice-President, a salaried Secretary-Treasurer and a Comptroller.

(a) Duties.

The President shall preside at all General and Special meetings, and shall be ex-officio Chairman of the Students' Council, and a member of the Executive of all Regular Committees. He shall represent the students on all public occasions.

The Vice-President shall perform the duties of the President in the absence of the latter.

The Secretary-Treasurer shall be custodian of all records, ledgers, receipts or documents of any nature whatsoever belonging or dealing with the affairs of the Society. He shall receive and deposit all sums accruing to the Society, giving receipts for the same.

The Comptroller shall supervise all disbursements.

(b) Election.

The President shall be elected annually between the first day of March and the semi-annual meeting of the Students' Society by a ballot of all the members of the Society. He shall be nominated by any 50 members. The President shall take office at the beginning of the fiscal college year. In the event of resignation, the Students' Council shall decide on a date for the election of a successor, the procedure of election being similar to that used in the case of the regular election. The successor so appointed shall hold office until the end of the fiscal year.

The Vice-President shall be elected by the Students' Council from among their own number before the fifteenth day of October in each year. In the event of resignation, a successor shall be elected by and from the Students' Council.

The Secretary-Treasurer shall be chosen by the Students' Council to hold office for the current year, the continuation of the agreement depending on ratification by each successive Council. He need not be a member of the Society and may be paid a salary.

The Comptroller shall be appointed by the University on the recommendation of the Council.

ARTICLE VI

Students' Council

- (1) The Students' Council shall be composed of ten members as follows:

- (a) The President of the Students' Society, who shall be Chairman.
- (b) One representative from each of the five faculties, Medicine, Science, Arts, Law and Dentistry, and one representative from the School of Commerce and one representative from the Theological colleges affiliated with McGill University.

These representatives shall be the Presidents of the Undergraduate Societies, to be elected on the third Monday of February each year, in each Faculty from the Junior Class thereof, by the members of their Faculty, and to take office March First. Nominations in each Undergraduate Society, signed by at least ten students of the Society, must be in the hands of the Secretary of the Students' Society at least ten days before the date of the election and published by him in the McGill Daily at least one week before such date, vote by ballot taking place on date of election. These members shall serve for one year from the first day of March following their election.

- (c) The President of the McGill Union and the Editor-in-Chief of the McGill Daily.

The President of the McGill Union, and the Editor-in-Chief of the McGill Daily shall be advisory members and shall possess no voting powers.

- (2) The powers of the Students' Council are as follows:

- (a) The executive authority of the Students' Society is vested in the Students' Council.
- (b) The Students' Council shall be the only recognized medium, outside of the Athletic Board, between the Students and the University authorities and the general public.
- (c) The Students' Council may summon, hear and discipline any member of the Students' Society for a misdemeanour. All decisions in such cases shall be referred to the Corporation.
- (d) The Students' Council shall appoint a salaried Secretary-Treasurer.
- (e) The management and control of the McGill Daily shall be in the hands of the Students' Council through the Editor-in-Chief of the Daily.
- (f) The management and control of the McGill Union, and all matters pertaining thereto, shall be

in the hands of the Students' Council, through the President of the Union.

- (g) The Council shall receive from the University all sums payable under Article IV, Section 1, except the amount payable to the Athletic Board and shall divide the same as provided in the said Article. All such bodies so receiving monies from the Council shall render annual accounts to the Council and their books and accounts shall be open to inspection and audit by the Council, or auditors or inspectors appointed by it on one week's notice.

- (h) All funds apportioned to the Students' Council shall be deposited in a chartered bank. All cheques drawn against such deposit shall be countersigned by the Comptroller, who shall satisfy himself before signing that the requisite authority exists.

- (i) All standing committees, as defined in Article VII, Section 2, shall submit, before the first day of November of each year, to the Students' Council, a tentative budget and program of their activities for the current year. No enterprise on the part of any such committee which has not been submitted to the Council, in the above manner shall receive financial aid from the Students' Council.

- (j) The Students' Council shall appoint the Editor-in-Chief of the McGill Daily upon the recommendation of the retiring Managing Board of the Daily.
- (k) The Students' Council shall appoint cheerleaders.

- (l) Two-thirds of the voting members shall constitute a quorum for the transaction of business.

ARTICLE VII

Committees

- (1) Regular. All clubs or societies, except those under the control of the Athletic Board, to which all students contribute, shall be constituted regular committees.

- (2) Special. Any other clubs or societies which affiliate themselves with the Council, and place their funds under its control, shall be special committees of the Society.
- (3) Standing. Any clubs or societies which are directly under the control of the Students' Council and whose constitution has been approved by the Council and whose constitution provides for continuity of office.

- (4) Athletic Board. The Students' Society shall have three representatives on this board.

- (a) The President of the Students' Council.

- (b) Two members elected by the ballot annually.

Nominations for these two representatives shall be signed by at least twenty-five members, shall be presented in writing and shall be in the hands of the Secretary at least ten days before the date of election and published by him in the "McGill Daily" at least one week before the date of election. They shall take office at the beginning of the fiscal year. Elections shall be held during the month of March.

- (5) The Students' Social Functions. The members of the Council shall constitute a committee on Students' Social Functions. All undergraduate bodies desiring to hold any entertainment or other social

functions in the Union or other University building must make application to this committee which may reject the same or forward it with its recommendations to the Principal.

The President of the Union shall be a member of this committee.

ARTICLE VIII

Meetings

- (1) There shall be an annual meeting of the Students' Society on the third Wednesday in October, at which the financial statement of the Society for the financial year ending on the thirtieth day of June previous shall be presented for adoption.

- (2) There shall be a semi-annual meeting of the Students' Society on the last Wednesday in February at which reports of the various committees for the current financial year shall be presented for adoption.

- (2-a) Reports from all committees shall be published in the McGill Daily one week before the meeting.

- (3) Special meetings may be called on three days notice by the President, or on the written request of twenty-five members of the Students' Society.

- (4) At each of the above meetings one hundred members shall constitute a quorum for the transaction of business.

ARTICLE IX

Funds

- (1) An annual financial statement of the Society and the various committees under its control for the past college year shall be published in the McGill Daily before the Annual Meeting in October.

- (2) The accounts of the Council shall be audited by accountants sanctioned by the University.

ARTICLE X

Order of Business

- (1) Reading of Minutes.
- (2) Business arising out of minutes.
- (3) Communications.
- (4) Business of Executive.
- (5) Reports of Committees.
- (6) New Business.
- (7) Notice of Motions.
- (8) General.

ARTICLE XI

This Constitution may be amended by two-thirds vote at a General Meeting of the Society, provided two weeks notice is given and published in the McGill Daily.

Miss Gaultier Reveals Wealth Of Our Balladry

(Continued from page one)

chief's daughter. This was followed by three more songs collected by James Toit. Then she sang beautiful lullaby "Nadudu" depicting a starving mother singing her child to sleep.

The next was a film of the Quebec Folklore Festival. Miss Gaultier then sang a group of French songs. She was dressed in the dress of the French peasant during the middle ages. The background was that of a peasant's cottage with a spinning wheel in the front. These songs were accompanied on a table harp.

R. V. C. Squad to Meet Western in Doubleheader

Varsity And Queen's Teams Will Clash Tonight

BRONZE BABY

Tonight at 8 o'clock, in Convocation Hall R.V.C., Western and McGill basketball teams will clash in the first game of the intercollegiate series. The second part of the double-header program will be the contest between Varsity and Queen's.

Western, present holders of the championship will floor a squad equally as strong as last year's. Their line-up, strengthened by the addition of three new players is regarded by some as the most formidable one in the league. Aileen Hallett, captain and forward player of the Westerners and Marg Turner, energetic centre are expected to show up well in the clash tonight.

McGill will enter the struggle with the strongest team in their history and with the advantage of their own floor. The players were run through a short snappy practice Wednesday night and seemed full of the old fight and pep that goes far to make a winning team. Strengthened by an influx of Freshette players Coach Slack has been able to turn out a squad that should succeed in returning the "Bronze Baby" to McGill.

Varsity arrived in Montreal last night so will have sufficient time to recover from their long journey. Undaunted by their defeat in last years meet they are out to win and will give the Kingston basketball a game fight.

Queen's although defeated by McGill in the first round of last years game have been practicing all year and report a practically new line-up.

The winners of tonight's game will play-off Saturday at 2.15 for the championship title. This will be followed by a contest between the losers, for the third and fourth place in the league.

The following representing the Varsity squad arrived in town last night.

The Varsity players arrived in town last night and put up at the Y.W.C.A. until they could be accommodated in the R.V.C. Their team is made up as follows.

Forward Wilma Hazlett
Forward Louise Crouch
Side centre Eleanor Sedgewick
Centre Dot Ker
Guard Betty Thomas
Guard Honour Tett
Sub B. Symonds
Sub Alice Nuckle
Sub Edith Peake

The other teams arrive in town today. Their line ups are not yet known.

Theology Wins Over Lawyers

Pile Up 26-8 Score Against Law Team

The Theology cage squad triumphed over the Law team by the one sided score of 26-8 in a regular interfaculty fixture played yesterday at the M. H. S. gym.

It was not long before Theology jumped into the lead. After a few minutes of play a penalty against Law enabled King to score on a free throw. However, a couple of minutes later Musselman put the lawyers in the lead when he made good on a two-shot penalty.

Their advantage was short-lived however when Addie tallied two baskets in quick succession.

The Theologians were setting a fast pace and the Law squad could not stand the powerful onslaught. Addie, Forth and Armstrong were combining nicely and the dazed lawyers offered little resistance. The play was all in the law territory throughout the first half of the tussle and the score at half time was 11-2 in favour of Theology.

The lawyers tried hard to score in the second half but could not penetrate the strong defense of Theology and had to be content with long shots. The Theologians held an advantage in the light of their forwards as a result were able to intercept the passes of the rather short lawyers.

Towards the end of the second half the lawyers recovered a little from the Theologian attack and netted a few neat baskets. Addie led the scoring with 16 points to his credit and Talpis and Forth came next with four points each.

The teams lined up as follows:

Forwards
Talpis Forth
Senzilet Addie
Centre
Musselman Armstrong
Defense
De Zivreck Sharkey
Bruker King
Subs
Leithman Secker
Erdrick MacLennan

DISCUSSION ON COACHES OF HARVARD FOOTBALL SQUAD

E. L. Casey Is Likely Candidate For Backfield Coaching Position. Dunn, Head Line Coach May Not Return. Final Confirmation Expected Next Month.

Cambridge, Mass. Feb. 27.—Rumors current in Boston newspapers to the effect that E. L. Casey '19 would become University backfield coach next fall and that C. J. Hubbard, Jr. '24 would be transferred from his position as coach of the tackles to that of line coach received no definite confirmation from W. J. Bingham '16, Director of Athletics. According to Mr. Bingham, the choice and appointment of the football coaching staff lies entirely with Coach Arnold Horween '21, and final substantiation of any report must await his arrival in Boston about the middle of next month.

Mr. Bingham stated that in view of the fact that Horween's contract holds for only a year and that the possibility of its extension is extremely doubtful, the athletic authorities have deemed it wise to place on the 1929 coaching staff those men who are outstanding candidates to succeed to the post of head coach. Casey's record with the Freshman squad has brought him more and more into the running for this berth, he said.

Hubbard, who is also being considered for this post, is expected to take the place next fall of R. J. Dunne, head line coach during the first three years of the Horween regime. Dunne has not as yet communicated his plans to the Harvard authorities, but there is reason to believe that he has accepted an offer of Wisconsin University to undertake coaching duties there.

The possibility of Harvard's obtaining the service of Congressman R. B. Wigglesworth '12 of Milton, to serve as strategist next year was also mentioned. Wigglesworth, who acted in this capacity under Houghton and Fisher, is known as one of the best tacticians in the football world. His duties as representative of the fourteenth district in Congress, and various sojourns abroad have kept him away from Cambridge during recent football seasons. He has not yet been approached by the Harvard authorities, but it was learned from Mr. Bingham that the University would welcome his services should he find himself able to give them.

Stage Is All Set For Game

Polo Team Had Last Workout Last Night

The stage is all set for the decision to be given as to where the Herschorn Trophy for intercollegiate water polo will rest in the summer and winter of 1929. Both teams held their last practises yesterday, and each team feels confident of winning this second game of the series. Referees have been chosen, as well as time-keepers and umpires, the tank is filled to the gutters, the polo-ball has been blown up and laced, and all seems ready for the best game that has ever been played in the intercollegiate series. And what makes it sure that the game will be such a tough struggle is the fact that McGill are facing a handicap of six goals, and feel that if they get going they may overcome this deficit.

Reports of the game in Toronto said that the McGill team showed lack of condition; this was true only in one sense. They were in perfect condition for a swimming game, with breaks and passes featuring the play, but had had little practise in the old wrestling tactics which used to furnish all the excitement when the Canadian rules were in vogue. Accordingly, in the first period, it appeared that McGill would win, for they kept possession of the ball most of the time, and were swimming circles round the Varsity players. However, soon after the beginning of the second quarter, Payton of McGill and Sinclair of Varsity came to grips in the shallow end, and wrestled for about five minutes before the referee called a face-off. Payton held on like a mastiff, and successfully prevented Sinclair from scoring, but was so blown when it was all over that any breaking or swimming after his cover was impossible.

In the same way, the other defencesmen, and even the forwards, were engaged in tussles with Sinclair and Spence of Toronto. After a period of this the McGill players were a tired lot, and were not so eager about breaking in the second half. Thus the game developed into a hang-on-and-wrestle match, at which Varsity were at an advantage due to their superior weight.

Things will be different in tomorrow night's game, according to Coach Harold Pisk. Though McGill will not

R.V.C. STAR

Jean Snyder, captain of the R.V.C. basketball team which will meet Western tonight in the first game of the intercollegiate series.

start the holding play, they are willing and prepared to take on the Toronto team in the heaviest sort of underwater work. The eight members of the McGill squad all have gashes and scratches to show from the last week's practises: even Gardner, the goalkeeper, has come in for his share. In the Toronto game the referee allowed play to come right inside the crease: three of the goals might better have been called touchdowns.

The crease rule, and all other tricky rules in the Canadian game, will be watched closely at the Knights tank tomorrow night. The referee will be Morris Bruker, a former McGill player of international experience, who refereed most of the games in the Canadian section of the city league this winter. On the other side of the tank will be Dr. Jim Ross as judge of play. Holding the watch as chief timekeeper will be Dr. T. C. Sullivan, Honorary President of the swimming club. The goal umpires and penalty timekeeper have not been decided on as yet, but the positions will be filled by members of the swimming team not taking part in the game.

The Toronto team arrive in town early this evening, and may have a slight workout immediately after so as to get used to the pool. The McGill squad worked out for the last time yesterday evening, depriving the "Learn to swim" classes of their period for one week. The players feel sure of winning the game; they are not so sure of scoring the seven goals necessary to win the championship. Nevertheless a determined attempt will make to bring the cham-

Victory Gained By Presbyters

Score 32-14 Victory Over Presbyterian College

In a regular fixture of the Inter-Theological College Basketball League played at the First Presbyterian Church yesterday, the Diocesan College triumphed over the Presbyterian College by the score of 32-14.

Effective combination plays almost always resulted in points for the Diocesan College and it was not long before they piled up a safe lead. Forth and Addie combined effectively and accounted for most of their team's points, while S. Sharkey of the Presbyterian College on several occasions broke through the opposing defense to hoop the twice.

The line-up:

Diocesan	Presbyterian
Forwards	MacLennan
Forth	S. Sharkey
Seeker	Centre
Addie	Murray
King	Guards
Bodger	Brown
Farrel	N. Sharkey
See	Subs
Wills	Fulford

Phlugumph!

Those who have made an intense study of the periwinkle and its sedentary habits join us in wondering why "Phlugumph," has not been taken into the English language and put into general use. It is most descriptive and, because of its construction and the placing of the vowels, is an ideal medium for expressing the emotions.

"Phlugumph," adequately describes the caressing sound a ripe tomato emits as it lovingly spreads over the bosom of a dress shirt.

"Phlugumph" is the only true description of how a Solar Plexus asks "How do you do" when suddenly introduced to a hard fist.

"Phlugumph" very properly describes the plaintive cry of a luscious hen fruit as it nestles behind your ear and softly spreads albuminous fingers down your neck.

"Phlugumph" is the only word yet discovered that completely describes the horrific feeling of a Cooed when she discovers the boy friend has not called a Standard Cab . . . also the distressing feeling of nausea that permeates his being when he gets hep to his social error and also thinks of the money he would have saved had he done as all others do and called a Standard.

Film Director Talks College

Frank Tuttle Interviewed By Trojan Editor

a man needs a college education. I Los Angeles, Cal.—"I don't believe really don't think a chap needs to have been graduated to become a successful director," Frank Tuttle, Paramount director, told Virgil M. Pinkley, Editor-in-chief of the Southern California Daily Trojan.

Tuttle is only one of the many university degree holders who is handling a megaphone on a Hollywood lot. In his own studio Rowland V. Lee, a graduate of Columbia, Clarence Badger who holds a degree from the Massachusetts Institute of Technology, and Dorothy Arzner from the University of Southern California are also producing Paramount pictures.

"Don't get me wrong, I'm not anti-collegiate, but pro-collegiate," he continued. "I know that a university training has proved valuable to me, but it is not the only thing that will make a great director."

"If a man, or in a few cases a woman, has the divine spark of showmanship, or acting, he has the most important asset in becoming a director."

"A university training is not a handicap to the youth who wants to become a member of the motion picture industry if he can take four years of broad cultural training, and still be willing to start at the bottom of whichever field he wants to enter."

"Take the case of Bernard Shaw. It is a classic example."

"Shaw is a law unto himself. Shaw has a message he wants to give the world and finds a medium in the stage to present such an expression. Don't let anyone tell you that he doesn't use the tricks of the trade, because he does. He has learned these by studying life, and not through education gained in a college, or university."

"Shaw is a marvelous showman and knows the ins and outs of the drama game."

"The great success of Austin Strong, who wrote the popular stage play 'Seventh Heaven,' later made into a film, is that he shows people. He doesn't try to tell the story in words, but rather through action and setting. His plays call for a great cast."

While a student at old Eli, Frank Tuttle took an active part in dramatics and wrote several one-act plays. Following his graduation he worked under Austin Strong and joined a group of players who gave a series of dramas in New York City. He was given a chance to direct a picture for an independent company. The picture was a success, so officials of Paramount offered him a contract, and he was sent West to make pictures in the Hollywood studio.

Tuttle believes that a great actor can make you feel anything. That is why he thinks Emil Jannings, Lon Chaney, Richard Arlen and Wallace Beery are splendid actors.

If you want to write plays, scenarios or become a director of motion pictures, Tuttle's advice is to go to plays and note the reaction of the audience. Watch how the play builds up to a climax, and how the lines of each character are handled. Make mental notes of the types of acting that appeal the most.

Another idea of Tuttle's is to go get something if you really want it. Throw yourself into it, with enthusiasm and pep. If you want to act like a tramp, or write about one, live the life of a tramp, or at least talk with one. Tuttle uses the example of Jim Tully as an illustration of a man writing about something which he knows.

College, yes if you get the ch, but don't think it is absolutely necessary. Study life, human nature in the raw, and travel and observe all you can before you try to gain entrance to a motion picture studio.

The Jersey cattle sale of B. H. Bull and Son in Toronto the other day resulted in the highest average prices for the breed yet recorded in the Dominion. Seventy-six animals averaged \$556. This included many yearling heifers and young bulls. The top animal, Brampton Bay Xenia, sold for \$8,000. This is the third highest price ever paid for a Jersey cow in North America.

In 1913 the Canadian Pacific Railway's tax bill was \$1,382,000; in 1927 it was \$7,358,000, an increase of 432 per cent, working out at \$20,160 per day, \$740 per hour, or \$14 per cent.

The Younger Set
"Oh, Jack, you always wear such a cute tie."
"It's a gift."

A Bum Steer
"That steer belongs to me."
"It won't belong now," said the cattle thief, drawing his forty-five.

Correspondence

The Editor,
McGill Daily.

Dear Sir:

After reading a letter under the caption "Insects at the Play" in the McGill Daily dated Feb. 28, I have come to the conclusion that the author has seen less of the world than I have which is not very much. He writes as though the Insect Play had shattered his illusions for the first time. In fact whatever his age may be I feel sure that he is still young.

What if we did see youthful idealism mocked and ridiculed. Youthful love may be very beautiful, but does it not invariably lead to the youths first, heartbreak, a thing of great consequence to him. If youthful love were ridiculed beyond existence all youth would be happier, and who, being once a youth, can deny this. What if we did see the poet a butt of a cynical character. Are not most poets the butt of cynical characters in real life? Is not thrift sneered at in this world, or do we live in an Utopia of idealism? Is not the result of people's thrift stifled and enjoyed by thieves in this world? Are there not people who sacrifice remorselessly to support their offspring, or is there aplenty for all the earth's inhabitants? Why should not the God of battles be implored to bring victory to the red ants? It is human nature to ask aid of some higher being whose presence is not seen, but felt. Lastly the cocoon who, the author states, escaped from its bonds only to die. Did the author ever stop to think what death is? The object of death is to release the body from life. Death is natural. Thus it is not the "undying idealism of mankind" that is satirized, but the natural course of life and death.

The Insect Play passed over the heads of many people in the audience. One lady was heard to remark that she was no wiser after than before witnessing the performance. I venture to agree with her. I also venture to place the author of the overmentioned letter in this same class. There are some people who can never see the truth reflected in a mirror.

D. L.

Red And White Revue Notes

Chorus Rehearsal in Moyse Hall at 5.15 today. All those present yesterday must turn out.

Male Pirate Chorus and Mr. Hart in the Union at 5 o'clock.

General rehearsal of all the cast on Saturday afternoon at 2 o'clock in Strathcona Hall. It is imperative that all who are taking a part be on hand at this rehearsal on time.

The stage construction gang will work out this afternoon at five o'clock on the stage of His Majesty's; everybody be there on time. Please keep Sunday open as there will be an all-day session.

Companionate Marriage Upheld

(Continued from page one)
couple tend to love one another more for the sake of their offspring. Whereas in companionate marriage there generally is no children, in the first few years, and consequently it is difficult for the couple to retain their love for one another.

The last speaker on the Affirmative side was David Lewis and in defending Ben Lindsay's theory he stated that it had for its basis the belief that scientific investigation tends to bring about greater happiness among mankind. We presume that in marriage the young couple are attracted to one another by love, not by money, therefore there is no difference between companionate marriage and marriage under the present conditions.

"Alf" Cooper, the last speaker for the negative, upheld his side by saying that, in the north American ideal of marriage, while inheriting the traditions and institutions of the old world, had yet been singularly free to develop a life of its own. The young people of Canada see in marriage not only a true relationship but an inspiring version of devoted loyalty and lifelong companionship. The greatest difficulty that arises from marriage today is from an improper knowledge of it. Modern marriage and the modern system is far more beneficial to humanity because it holds the man and woman living for the highest of ideals.

Louis Dobrowsky and H. C. Herman acted as judges for the debate and were unanimous in their decision though this decision was difficult to make.

Dean Laird of Macdonald College St. Anne de Bellevue has, during the past five years, conducted over fifteen hundred people through the west. This year he is planning a sixth all-expense tour with special train accommodation.

McGill Daily is printed by the Herald Publishing Company Limited for the Students' Executive Council of McGill University of which Gilbert H. Fletcher is the Secretary-treasurer, at the office 620 Sherbrooke St. West.

Germ Inspection Best Discovery

(Continued from page one)
cally regulating the chemicals in it. The same instruments may be used to bombard the body with oxygen.

The sun is a wonderful remedy, but unfortunately dust intervenes so that we have to manufacture our own solar energy. The speaker then showed ultra violet and infra red rays, explaining their respective effects on the body. He stated that although unknown ten years ago, this process is now being used extensively the world over.

It is due to the fact that x-rays penetrate deeper than ultra violet rays that they can be used to better advantage. They are shorter than the ultra violet rays, and are more effective.

Speaking on the industrial uses of ultra-violet rays, Dr. Fisk stated that cows give milk, richer in vitamins, if their food is treated with ultra-violet rays. If, on the other hand, milk is subjected to this treatment, it will be purer and richer than the pasteurized product.

Choral Society

Important rehearsal tonight in Strathcona Hall at eight o'clock. All members must be there. Bring your copies of Pinafore, and be on time.

Notices

Notices must be legibly written on one side of the paper only and must be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

LAST CALL FOR PHOTOS

Executive groups which have had their pictures taken are requested to make a selection of the proofs immediately or one will be selected for them for insertion in the Annual. This is the last call for those group pictures which have not yet been taken.
